WHAT WE HAVE ACHIEVED

After almost 3 years of work, we are about to finalise our project. We have already available on the project's website the **Model of working with a pupil returning from abroad to the native education system** and the **Model of working with a foreign pupil coming to a new country** (adaptation of foreign pupil) in all the partner languages: Polish, Greek, Italian and Spanish. The models aim to support the schools and parents in transitioning a child to a new school accompanying them throughout the whole process from the moment they make the decision to move to a new country up to their full integration in the new country.

The **m-learning for parents** is available in all the partner languages. The English version already has voice-over and we are working on the rest of the models, so that voice-over will be available as soon as possible. The m-learning for parents consists of an online space to develop the skills of parents for supporting their children in the process of changing schools and adapting to the new education system. You can access the materials on our website:

WORK IN PROGRESS

Both, the **online course online e-learning platform changing perspectives**, and the **training toolkit - pupil adaptation** are almost finished. We have just finished the piloting and the partners are finetuning the materials. They will be available on our website very soon.

WHAT ELSE HAVE WE DONE?

In addition to all the above-mentioned results, **two mobilities** have taken place in the framework of the project, the first one in Cyprus hosted by Xenion School for experts and educators and the second one in Rome, hosted by Assisi International School of Fondazione Patrizio, for students and teachers. Both mobilities were a success and both teachers and children were very happy with the experience and the knowledge acquired.

LAST PARTNER MEETING

The **last meeting of the project** was held in **Poland**. In this last meeting, we discussed the last details to finetune the project results and the website, as well as the multiplier events that will take place at the end of May/beginning of June, before the schools start their summer holidays. Another topic discussed was sustainability and exploitation of the results. Our aim is to reach as many schools as possible, as this is a very actual and necessary subject. Since we have two Polish partners in the project, we had two hosts. On the first day, we met in Wohyń. Our host, Zespół Szkol, showed us around the school and the pupils gave us a short concert. On the second day, we met at the premises of OIC Poland, the project coordinator.
